Debugging Human Systems

Using the Tech Stack to rethink your
approach to leadership

Nonviolent
Leadership

Hi! I'm Maureen

- Lifelong human dynamics nerd
- 10 year veteran of Automattic (the SaaS company that builds WordPress.com, WooCommerce and several other (mostly) open source web applications
- Founder of Nonviolent Leadership where I help high-performing tech professionals become effective leaders by applying their existing systems expertise to the human systems they now lead.

The Tech Leadership Paradox

The single biggest predictor of employee job satisfaction is the boss's technical competence.

Source: Artz, Goodall, & Oswald (2017). "Boss Competence and Worker Well-being." *ILR Review*, Vol. 70, No. 2.

AND

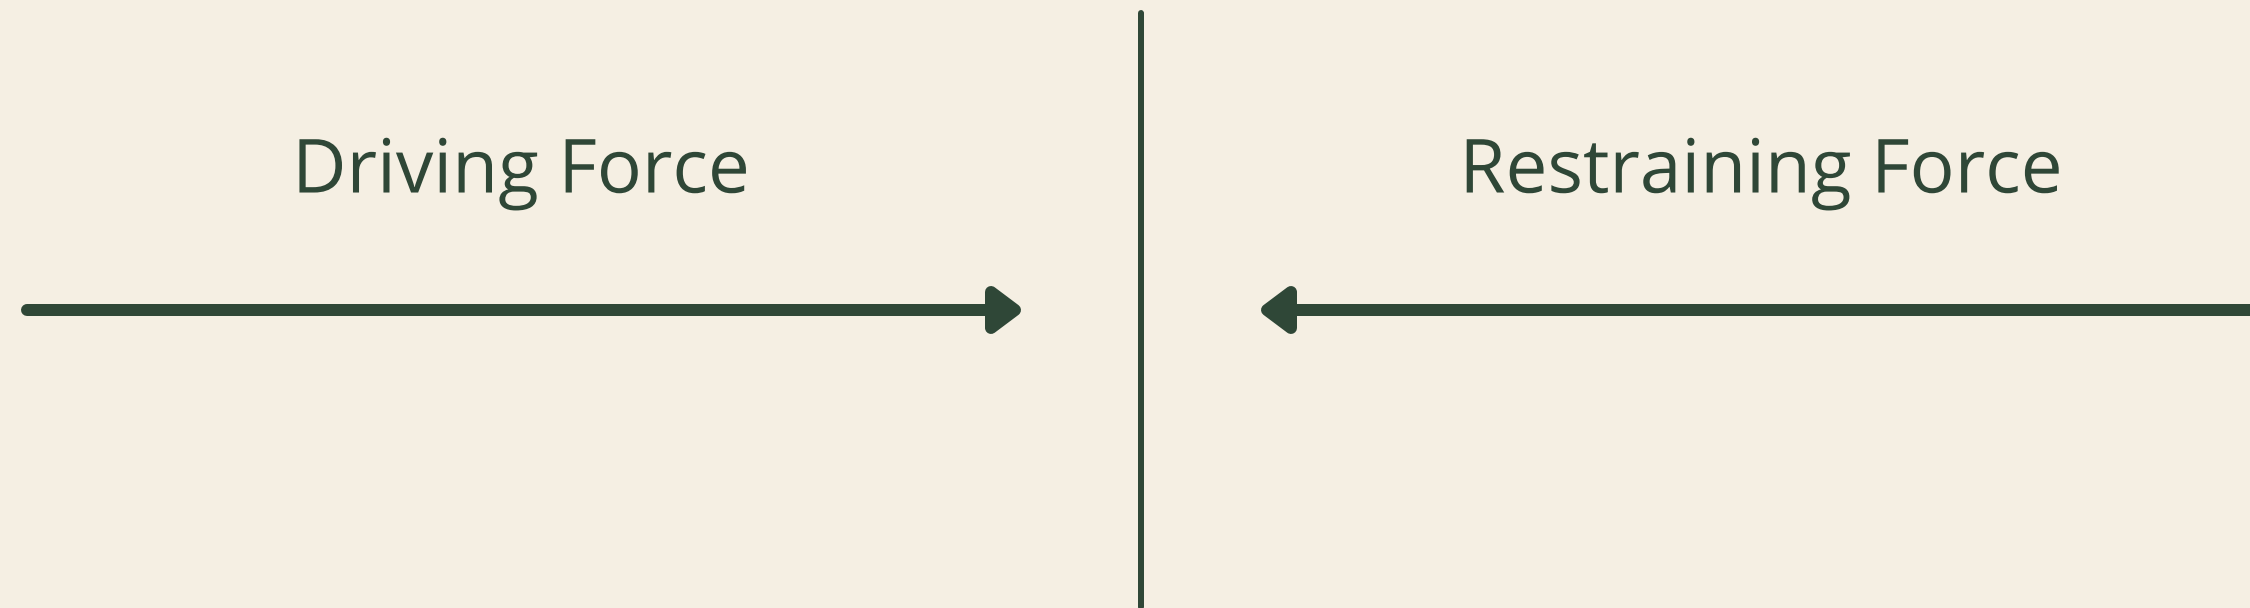

31% of respondents would consider quitting their job if they were forced into a people manager role

Visier (2023) New Research Shows Individual Contributors Shun Management.

60% of first time leaders fail or quit within two years

Gartner, Inc. (2017). Addressing the Early Signs of Manager Failure. (Original research by CEB Global). [gartner.com](https://www.gartner.com)

What makes leadership hard?

The Force Field Analysis Model: Kurt Lewin, Frontiers in Group Dynamics (1947)

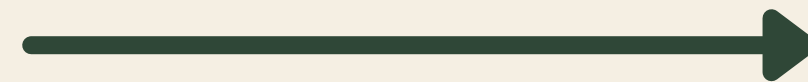

How do you address the restraining forces?

Tech Stack

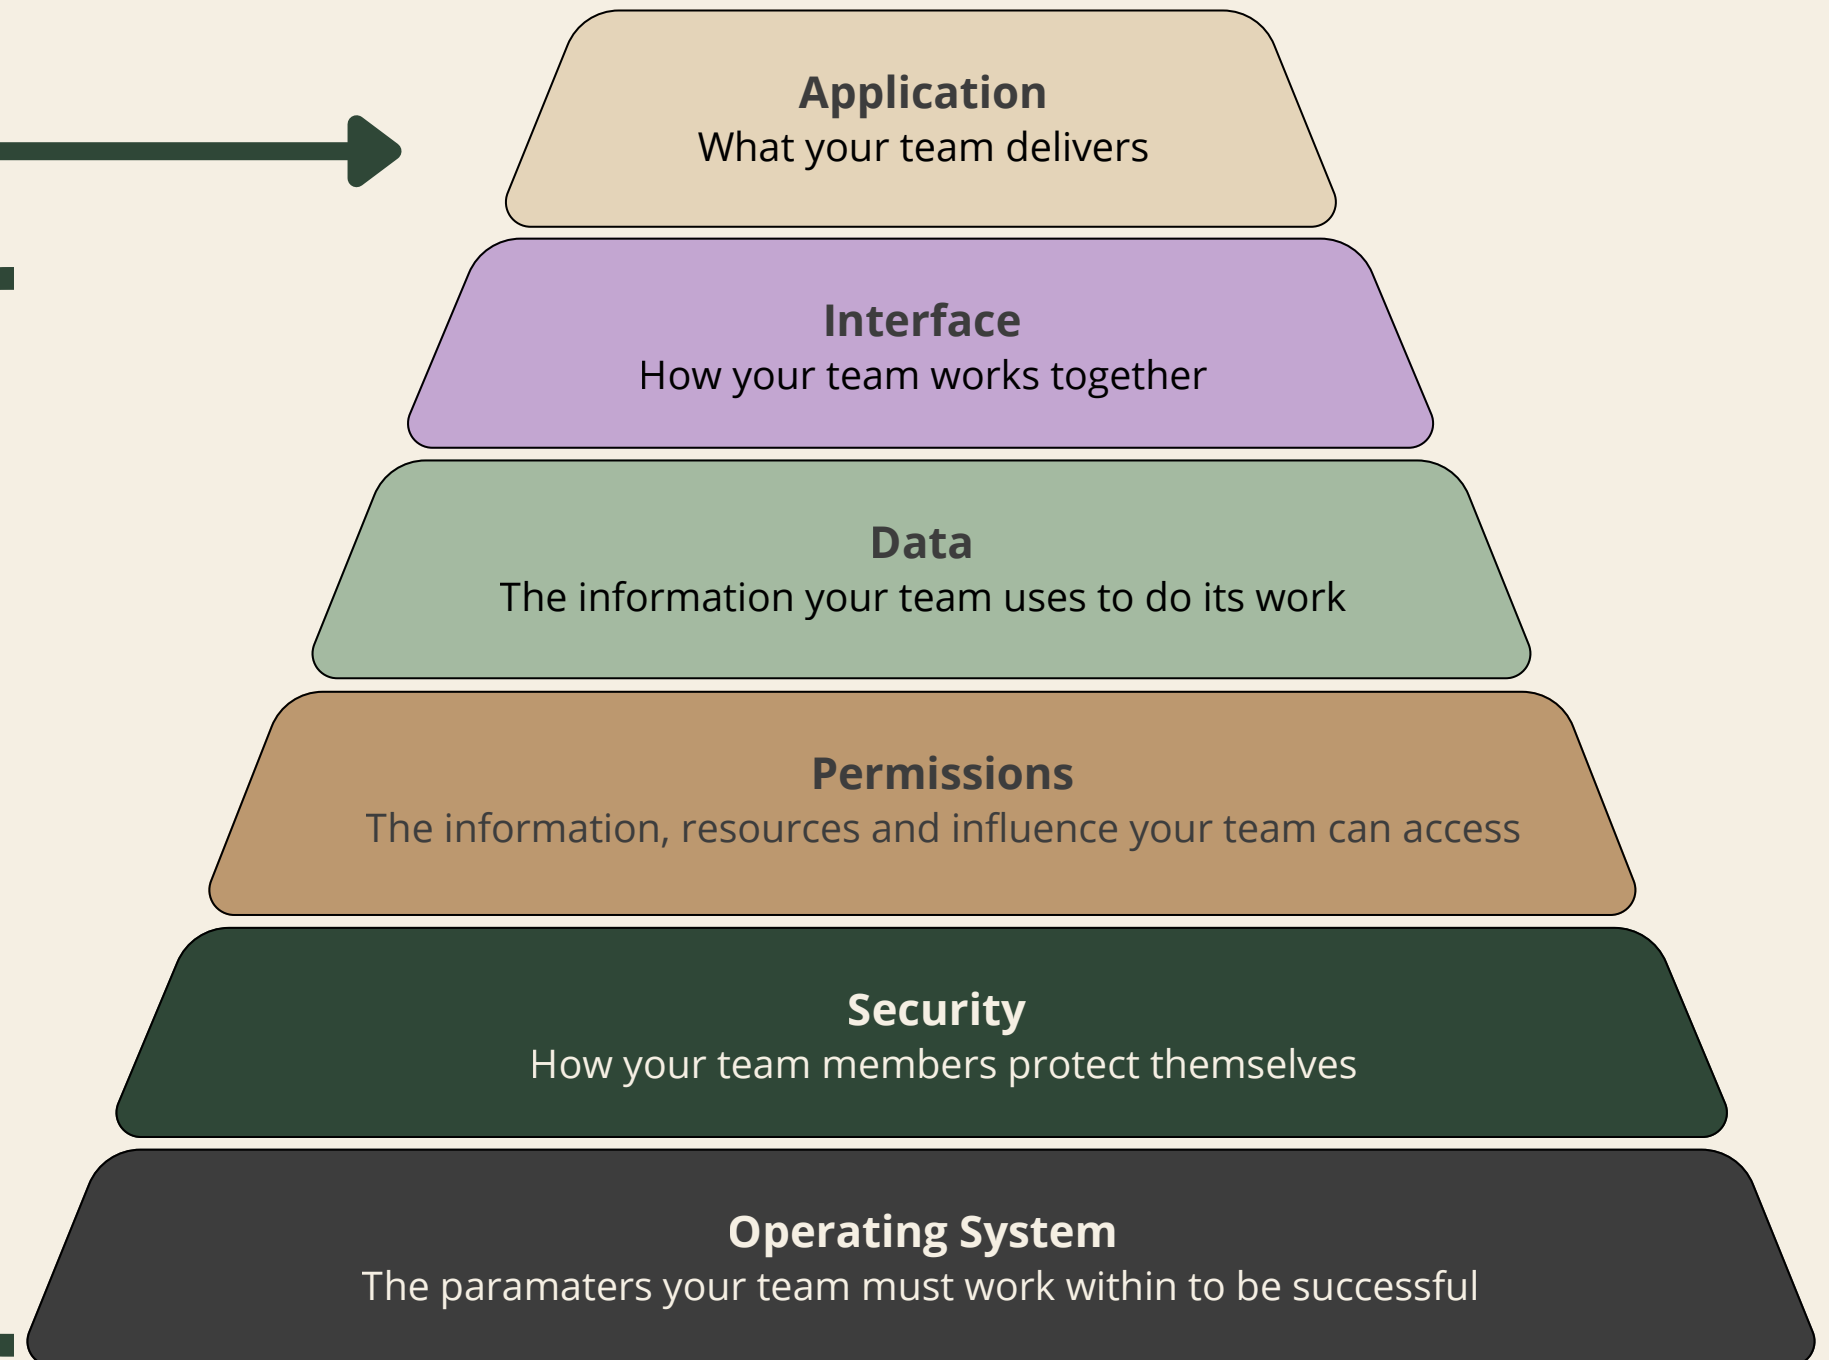

Leadership Stack

What you want to change

How you change it

How to use the Leadership Stack

Notice

Has pushing stopped working?

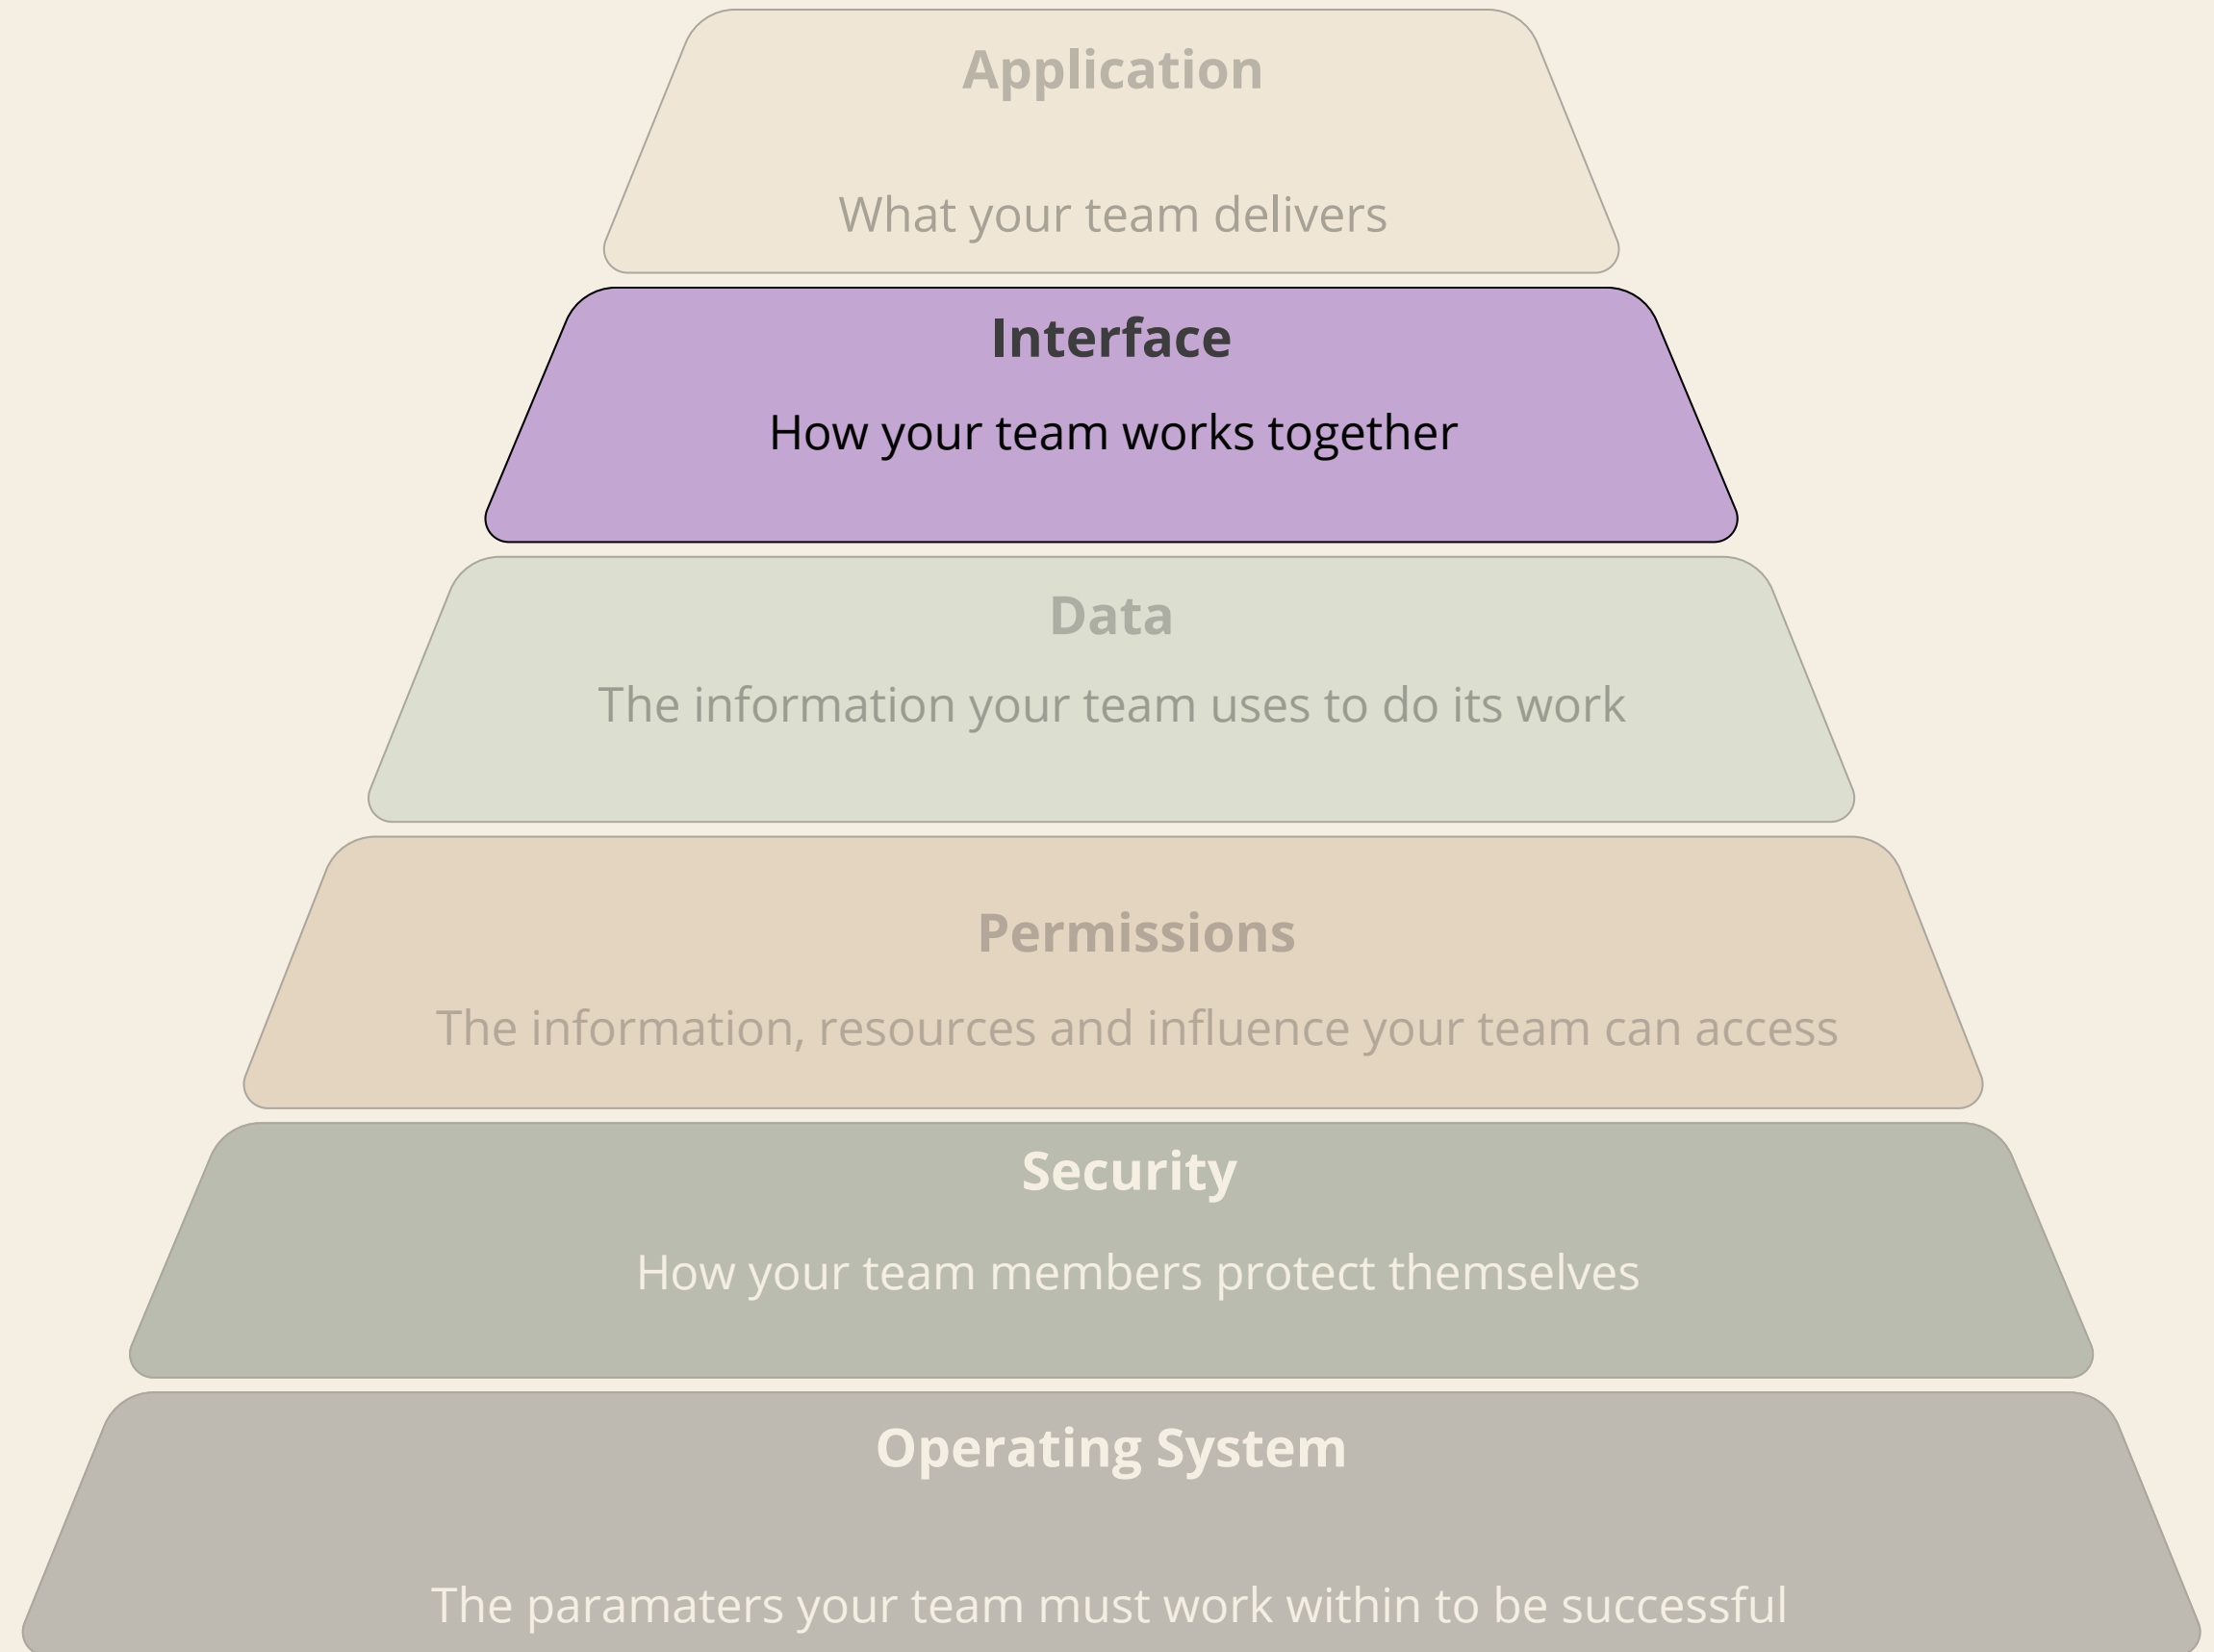

Identify

Where is the resistance coming from?

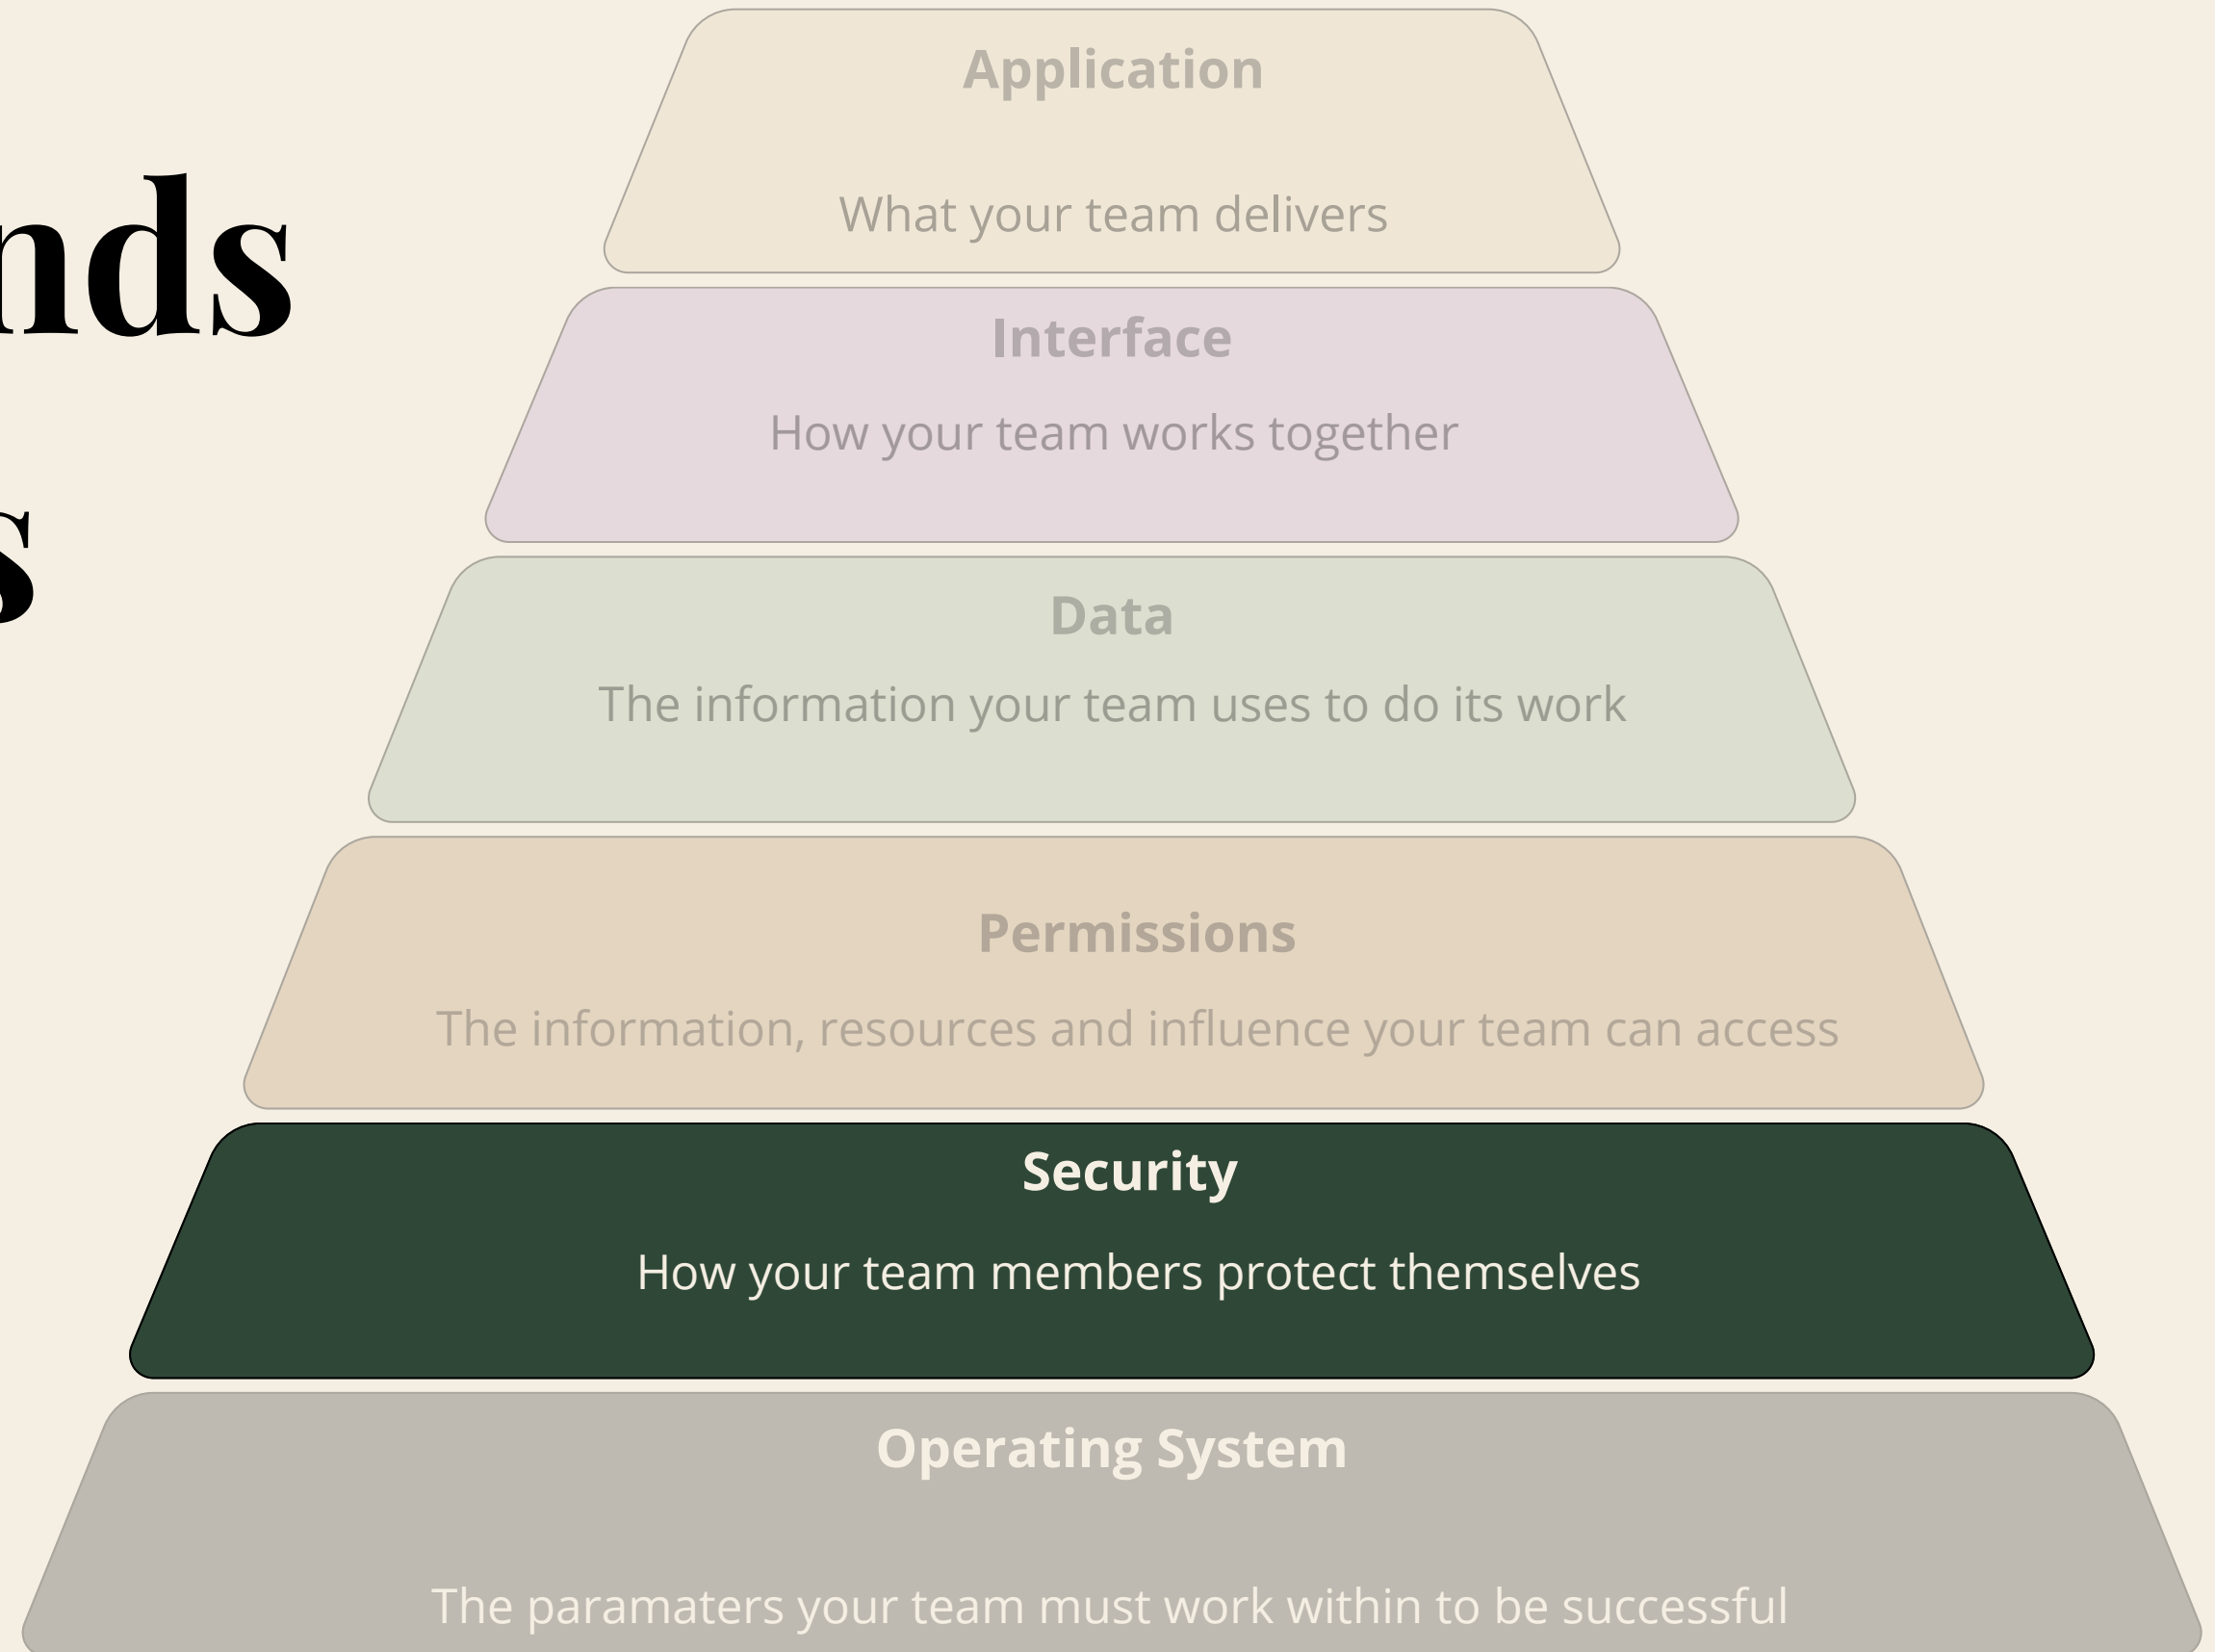

Redirect

How can you work with your team to resolve the resistance?

**“Reporting
bugs is
pointless.
They never
get fixed”**

**“She responds
to our ideas
with thinly
veiled
contempt”**
