How We Build Software

Code Centric

Traditional IDE-driven development with manual coding, debugging, and testing workflows

Visual Design

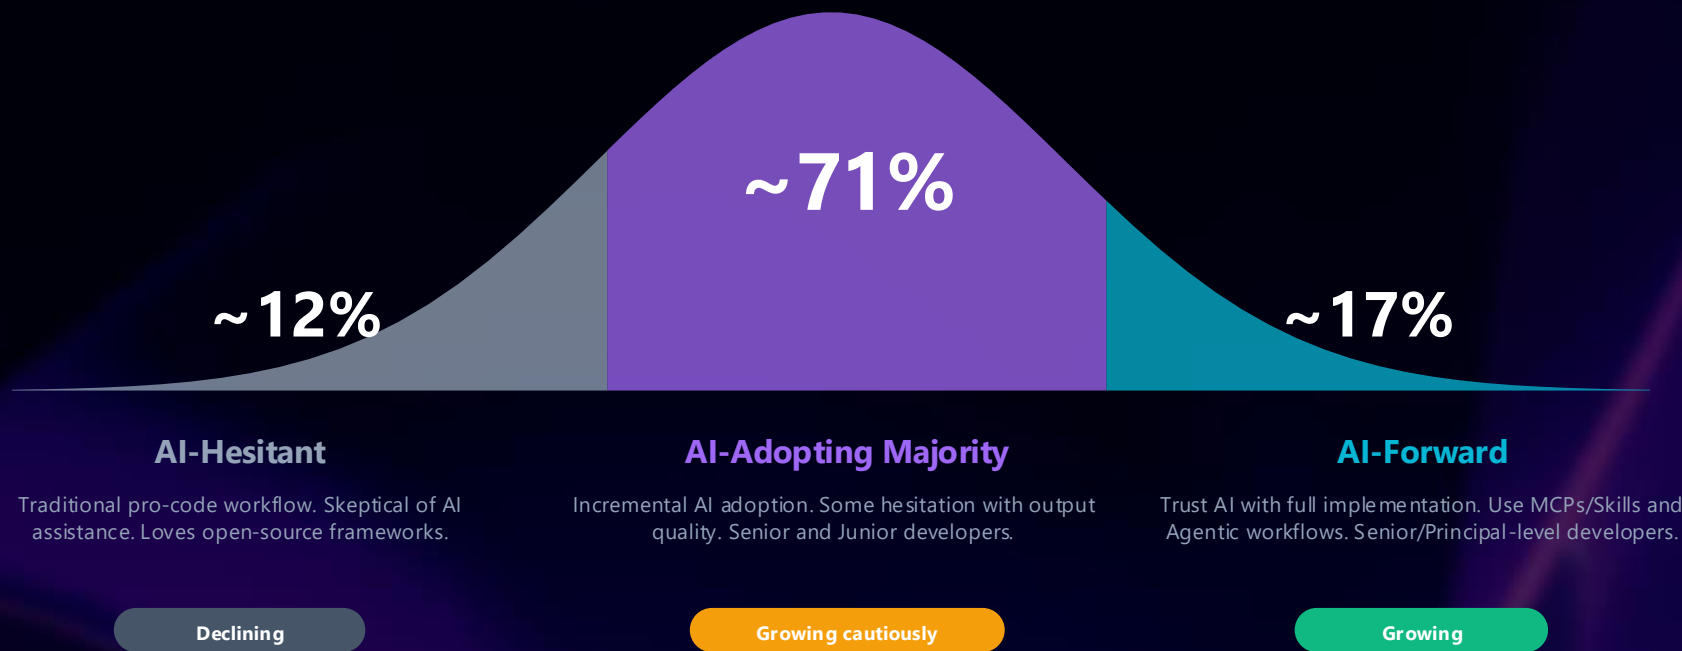

Drag-and-drop tools and visual builders for rapid UI prototyping and design-to-code flows

AI Enabled

AI-assisted code generation and intelligent development powered by AI Agents & Models

Tech Stacks Should Serve the Adoption Spectrum

It is the age of AI, But ...

Context Matters, Big Time

Some Pitfalls of AI Models/Agents

01

AI Hallucinations & over corrections are real

02

AI Models have timestamped knowledge

03

AI Agents often lack App context or best principles

04

Context Window, Costs & Specializations matter

05

Agentic workflows need to be grounded & validated

06

Enterprises need more confidence with AI tools

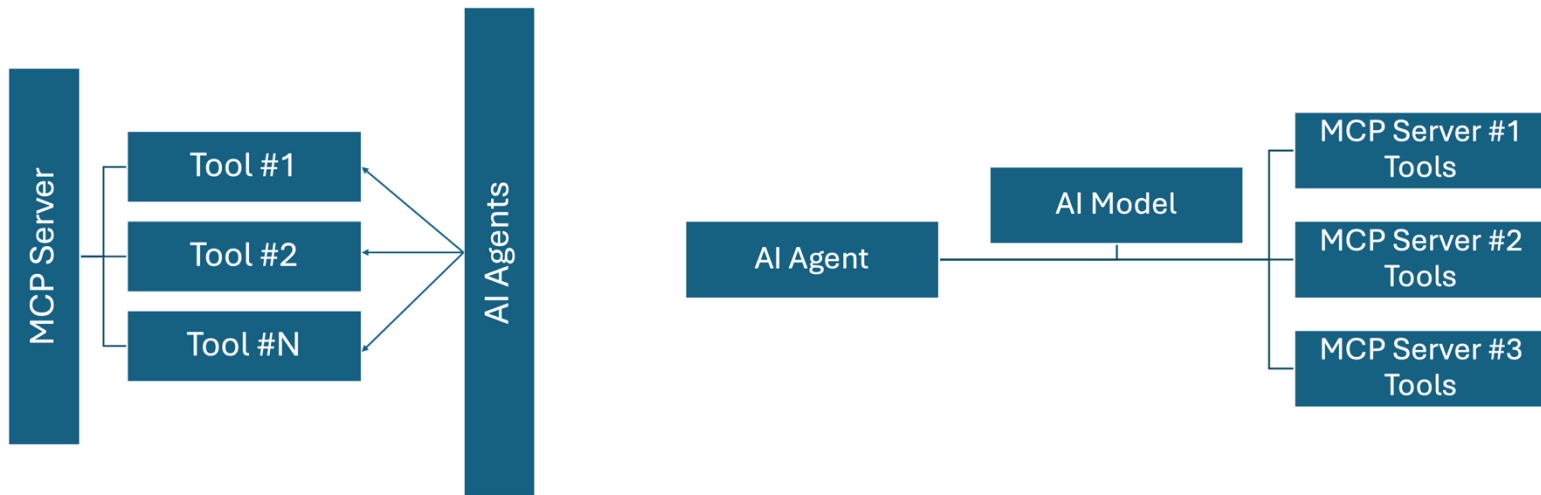

Model Context Protocol

The Future with MCP

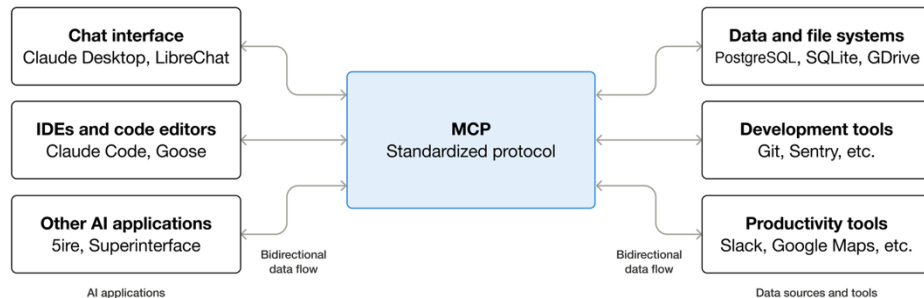

- ❖ No Knowledge boundaries
- ❖ Specialized Tools for computational Tasks
- ❖ Bring the Context

MCP Architecture

- ❖ Solid specs & lots of SDKs
- ❖ Division of labor – Host | Client | Server
- ❖ Transport options – StdIO | HTTP with SSE | JSON RPC

Skills, SubAgents & Instructions

Food Industry Simile

AI Agent = Chef 👨‍🍳 👩‍🍳

MCP Tools = Raw Ingredients 🍌 🥩

Skills = Recipe Cards 📄 🖨️

SubAgents = Sous Chef 🔪 🔍

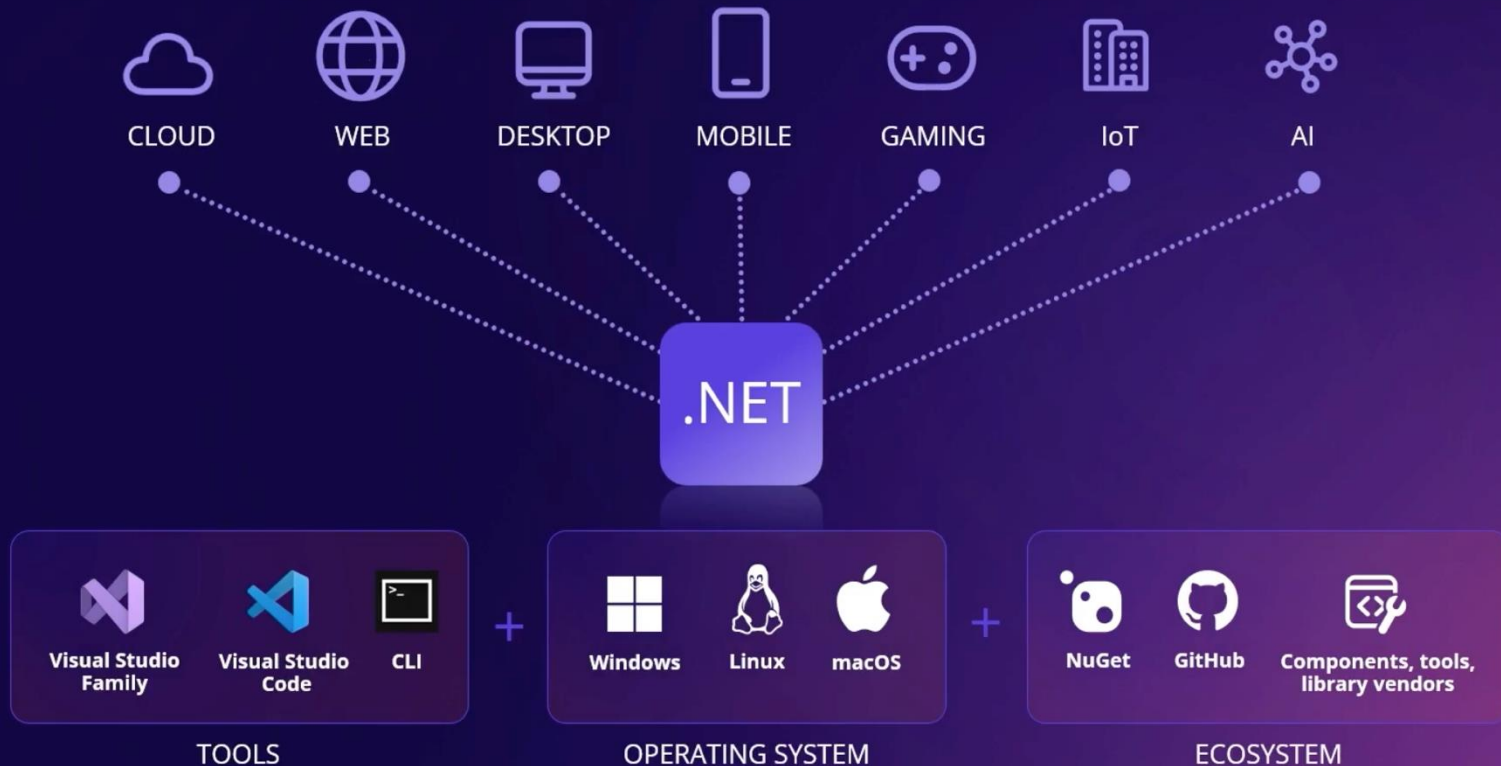

Loops = Door Watcher 👤 👁️

Developer = Restaurant Owner 👑.

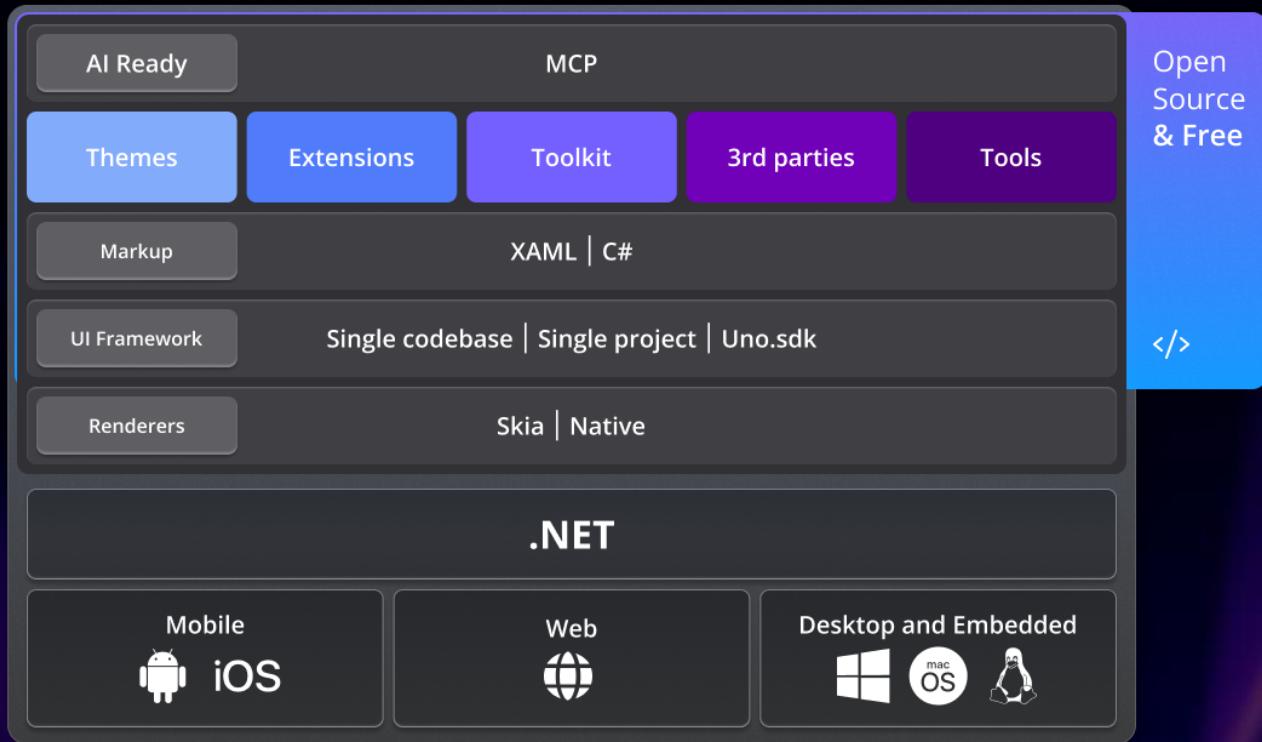

You run the show.

Build anything with a unified platform

The Foundational Stack

Ultimate Developer Productivity

MCP Tools

MCP Servers grounded in Docs and App Interactivity tools for agentic workflows

Hot Design

w/ Hot Reload

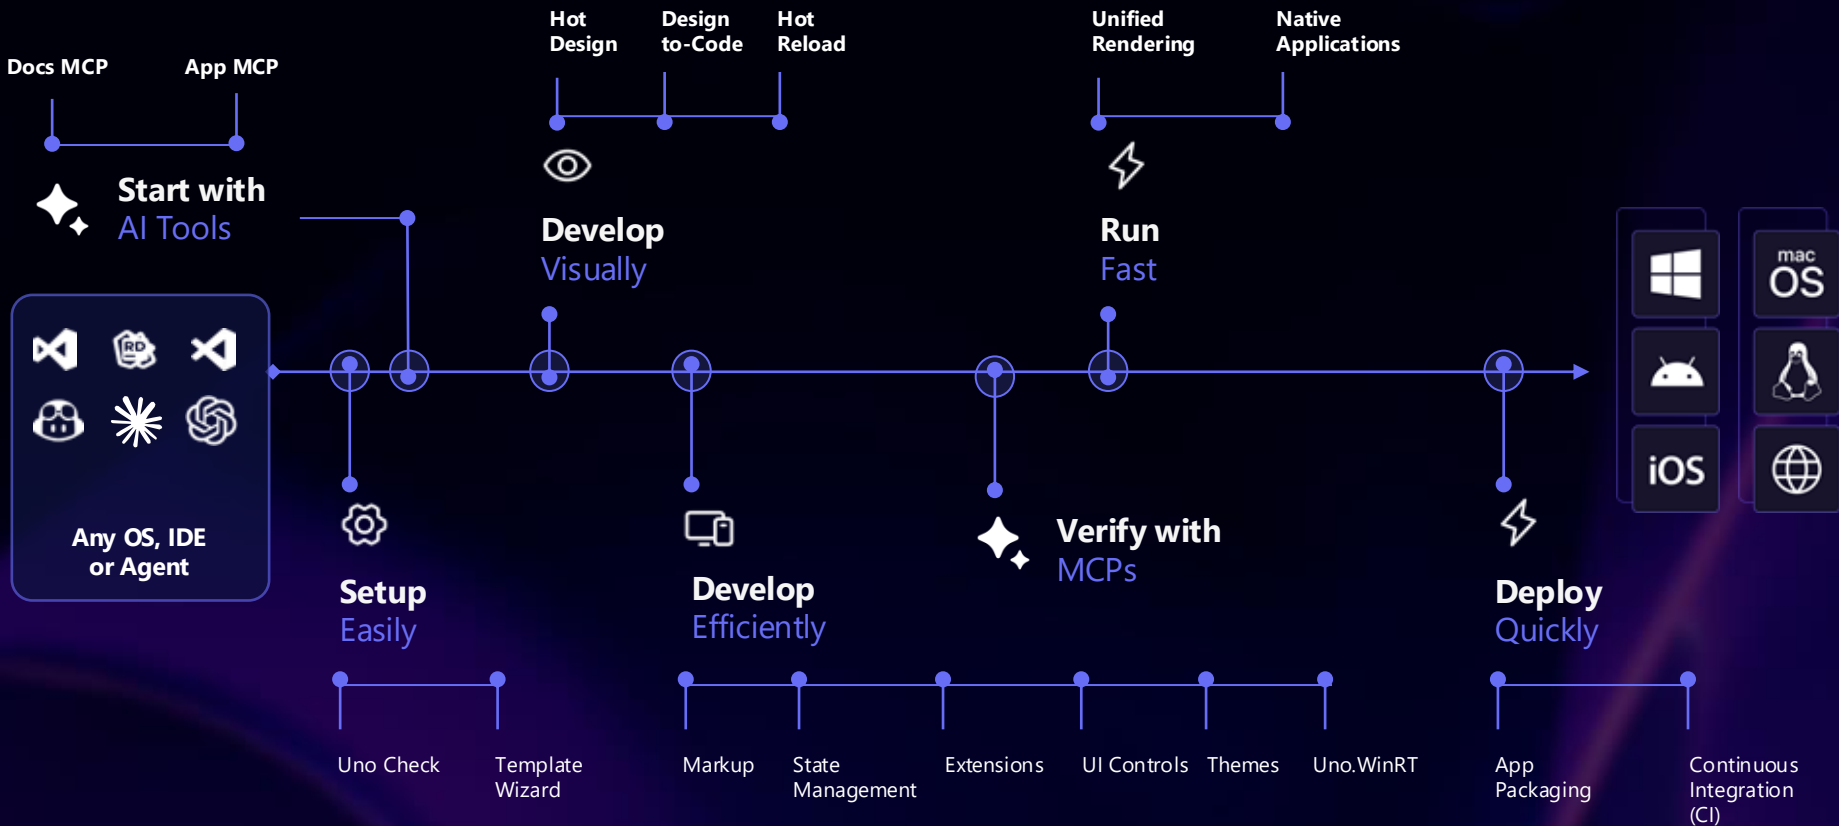

Runtime visual designer and Hot Reload for rapid UI building directly in running app with real data

Design to Code

Seamless Figma-to-code pipeline that converts visual designs into cross-platform App UI

Tooling from Start to End

Hello Studio Agent from Browser

Specialized Agent

Skills | MCP Tools | Agentic loops

No IDE/CLI to install

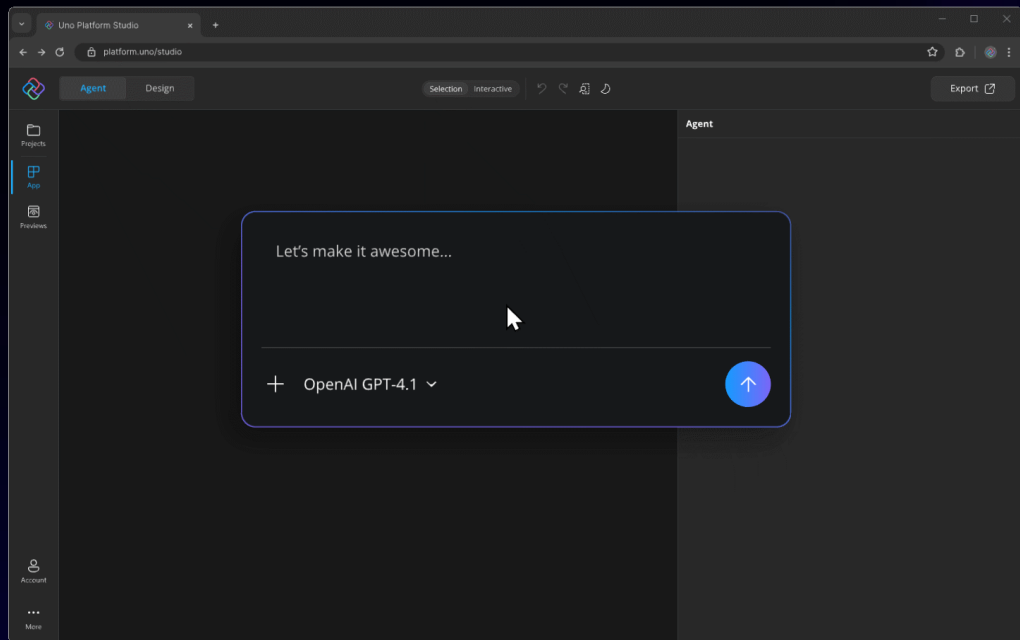

Start from prompt | Iterate visually in browser

Full .NET output

Cross-platform project code | Export when ready

Continuity of Experience

Studio App works on Desktop, Web & Mobile

Enabling Agentic Workflows

Previews

Preview and validate UI components in isolation, across states, themes, data contexts & breakpoints

Snippets

Drag, drop and customize responsive UI building blocks to speed up screen design

Agent & MCP

Specialized Harness and MCP Tools for Hot Testing & performance tuning with AI Agents

Skills & Plugins

Prescriptive Uno Platform guidance and modular instructions for inspired Agentic workflows

Contextual Tools | Agentic Workflows

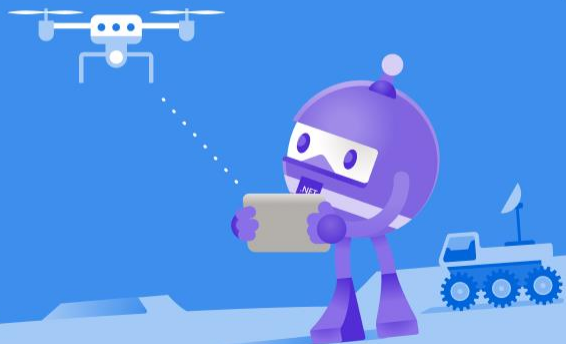

AI Tooling in Dev Workflows

- ❑ Skills or Sub-Agents
- ❑ What MCP Tools help
- ❑ IDE or Editor or CLI
- ❑ Multi-Agent Orchestration
- ❑ Pitch Agents against each other

Developers: You run the show.

Seeing is Believing ...

Here's to Contextual AI that boosts Productivity

Embrace At Your Own Pace 🤖 🧠

The world runs on software
